# Rhecipe Manager

Team 'h' - Nicholas Antiochos, Emi Simpson, Caitlin Arf, Min Kyi Htun

What does it do?

- The recipe manager allows users to create recipes as well as search for and make recipes in the database
- Each user has an inventory of their owned ingredients
- Users can run analytics to see the most made recipes, most common ingredients, and how many recipes are made weekly

Technology Used

- Python - frontend application, program logic
- bcrypt - password encryption and decryption
- Postgres SQL Server - data storage and manipulation
- Psycopg2 - communication between application and Postgres server

Most Common Ingredients

Results

- Kosher fermented white wine sandwich, water cake, and mega cheesed relish float were made twice this week, making them the most made recipes
- 3 recipes were made the week of 10/28, none the weeks of 11/4 or 11/11, and 6 the week of 11/18
- Peanut butter is the most commonly required ingredient

Most Made Recipes this Week
